FELT POLISHING FLAP DISCS

Flap discs made of 70% wool felt affixed to a fiberglass backing plate to create a thick polishing pad. The individual flaps are flexible, and allow a cool air flow. Felt discs are used with polishing compounds or pastes to provide up to a mirror finish. Ideal for work on irregular or contoured surfaces. Available in several Densities and Flap Thicknesses for softer and more flexible performance.

Felt polishing Discs with **reduced backing** are a perfect solution to polish into corners.
